[EPPM] Installing Agent

Follow

김현정(Laura)

Created : 02/28/2024 · Edited : 04/12/2024

1. Overview

- This article describes how to install EPP agents powered by AhnLab.

2. Table of Contents

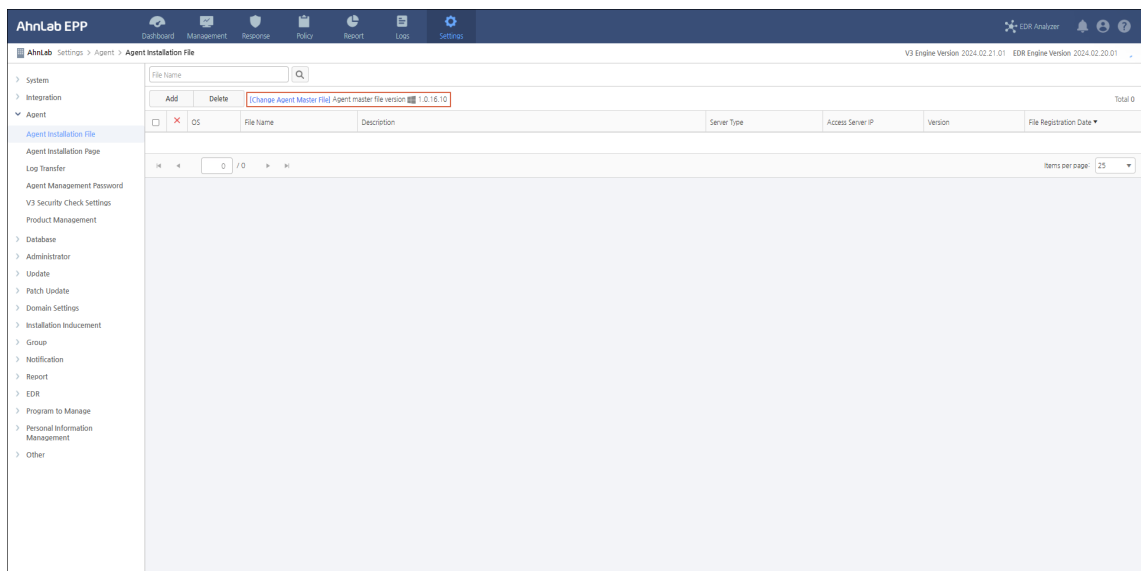

- Add Agent Installation File
- Download Agent Installation File
- Install Agent

3. Add Agent Installation File

3-1) Check Agent Master File Registration Status

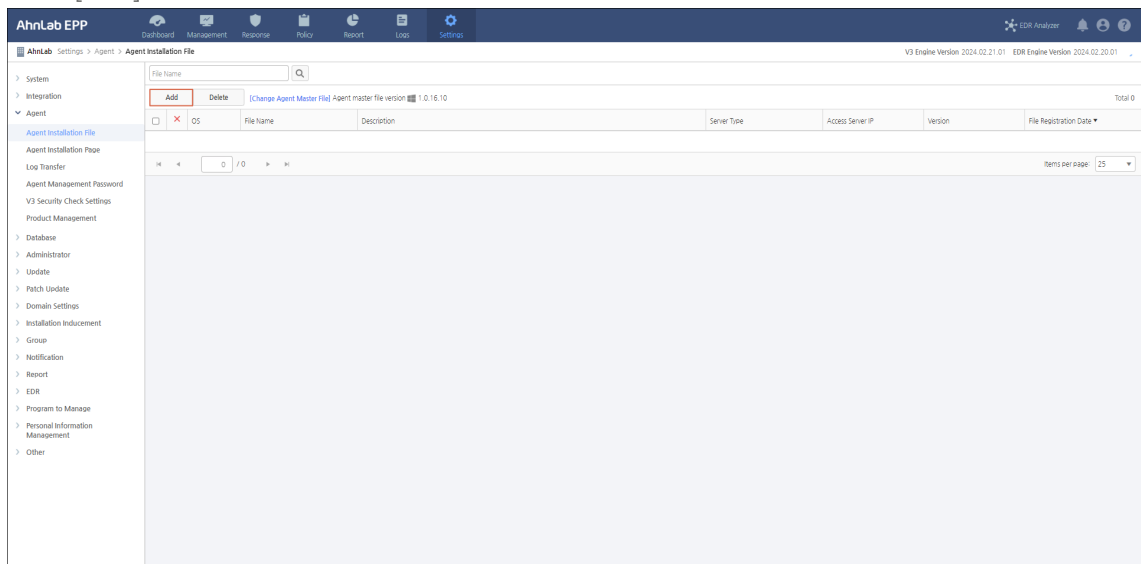

- Go to Settings > Agent > Agent Installation File in the EPPM Console to check if an Agent Master File is registered.

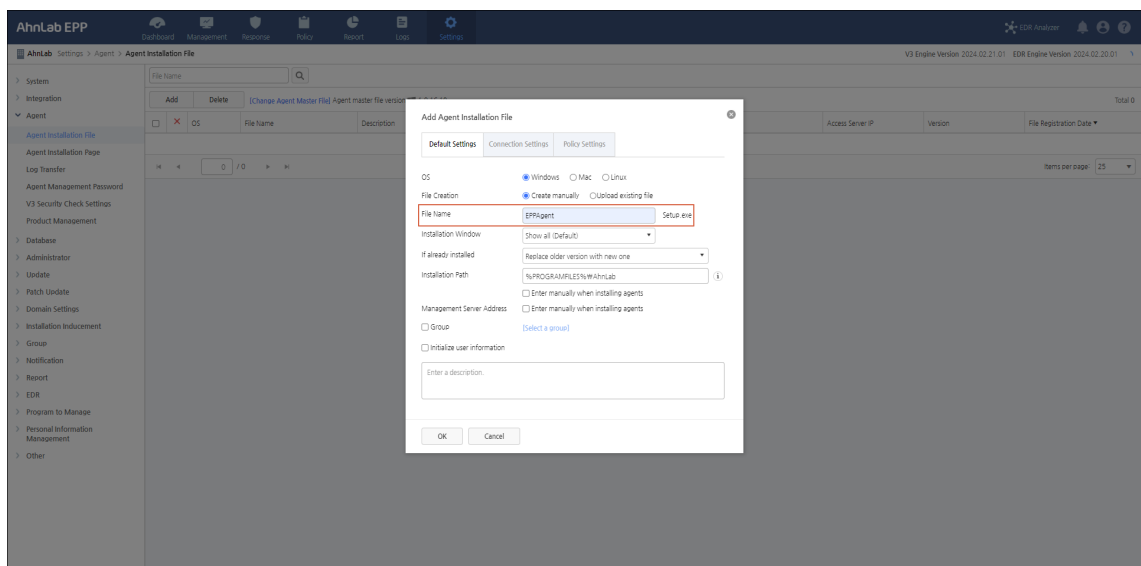

3-2) Add Agent Installation File

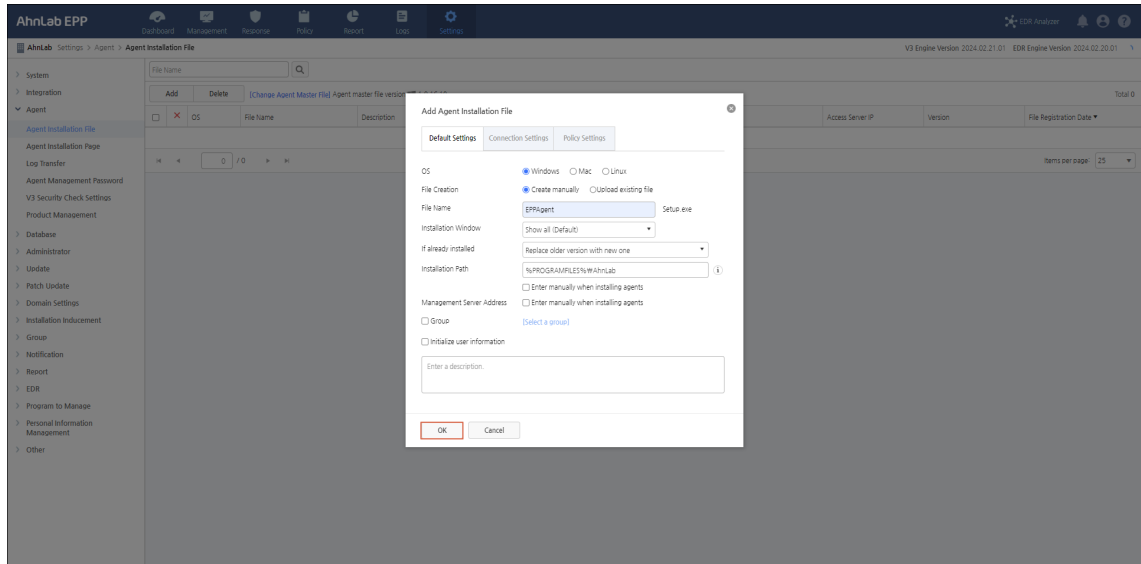

- Click [Add].

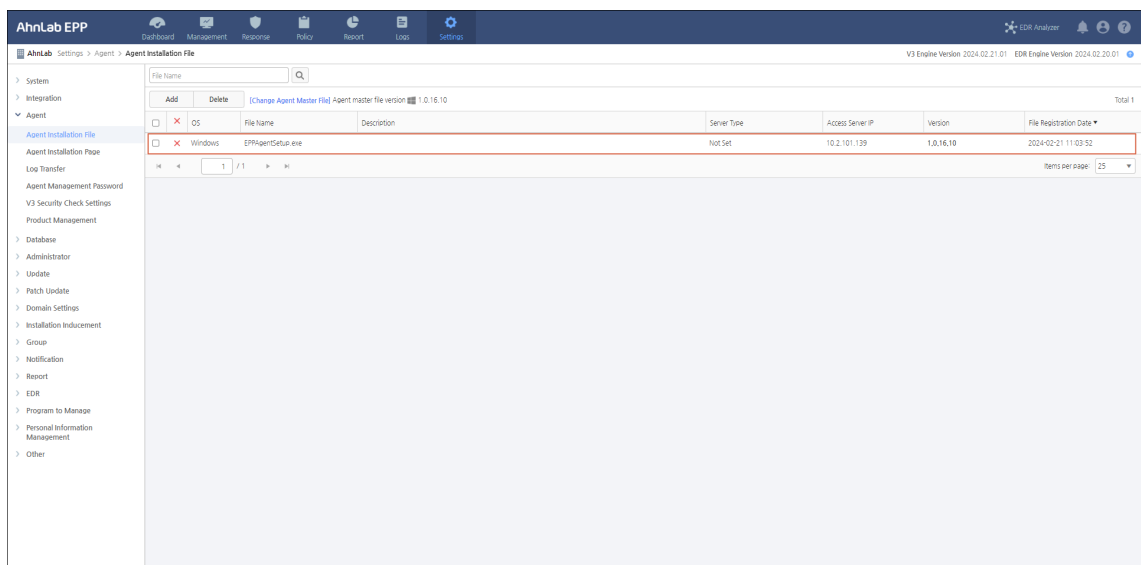

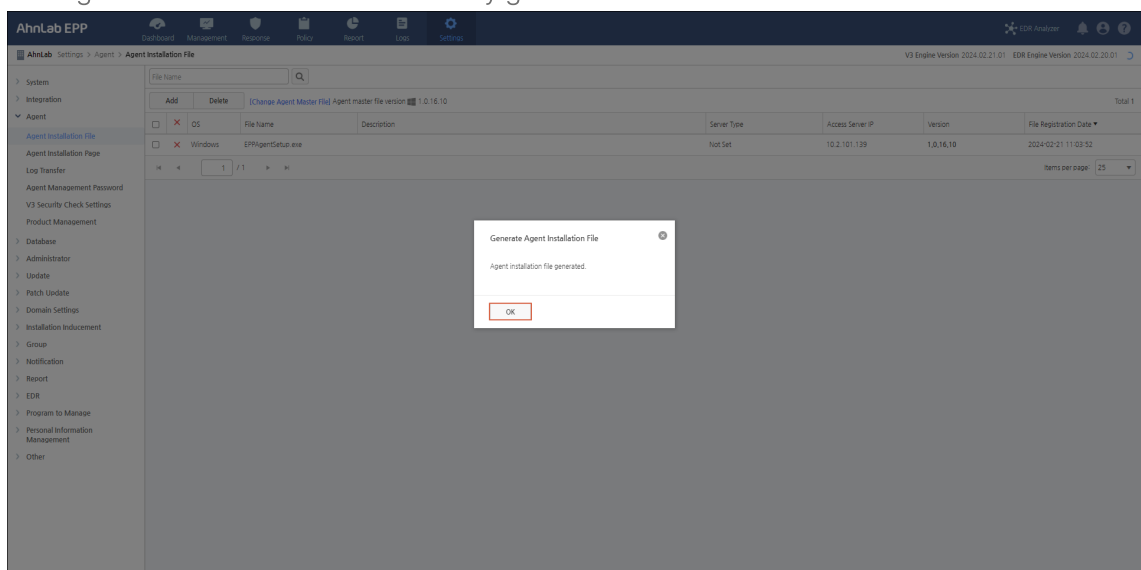

- Enter in File Name.

- Click [OK].

- The agent installation file is successfully generated.

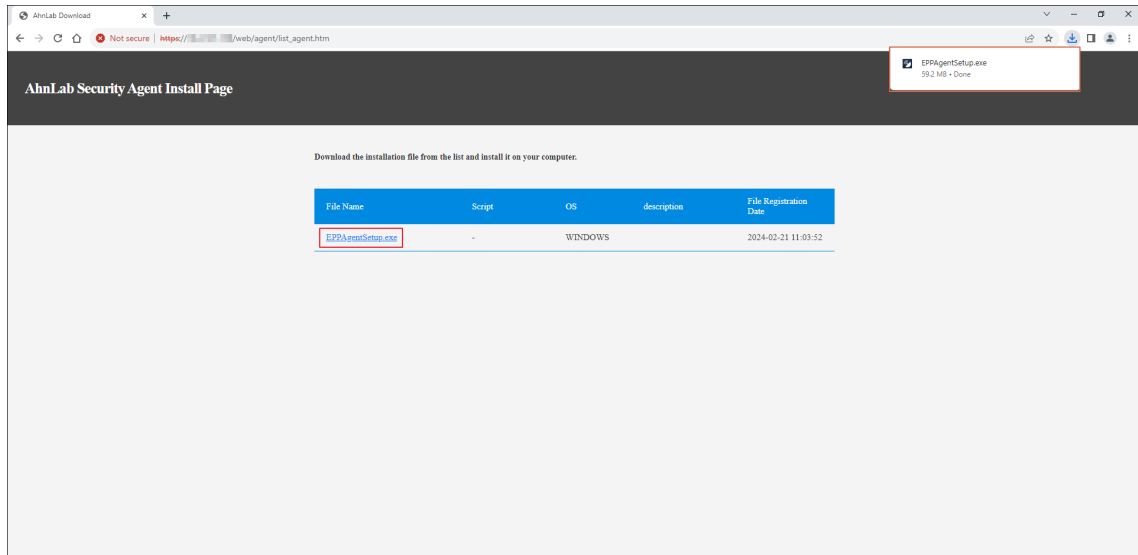

4. Download Agent Installation File

4-1) Access the Agent Installation File Download Page

- Access <http://Server IP:5465> or <https://Server IP:5645> from the PC to install the agent.

4-2) Proceed to Download the Agent Installation File

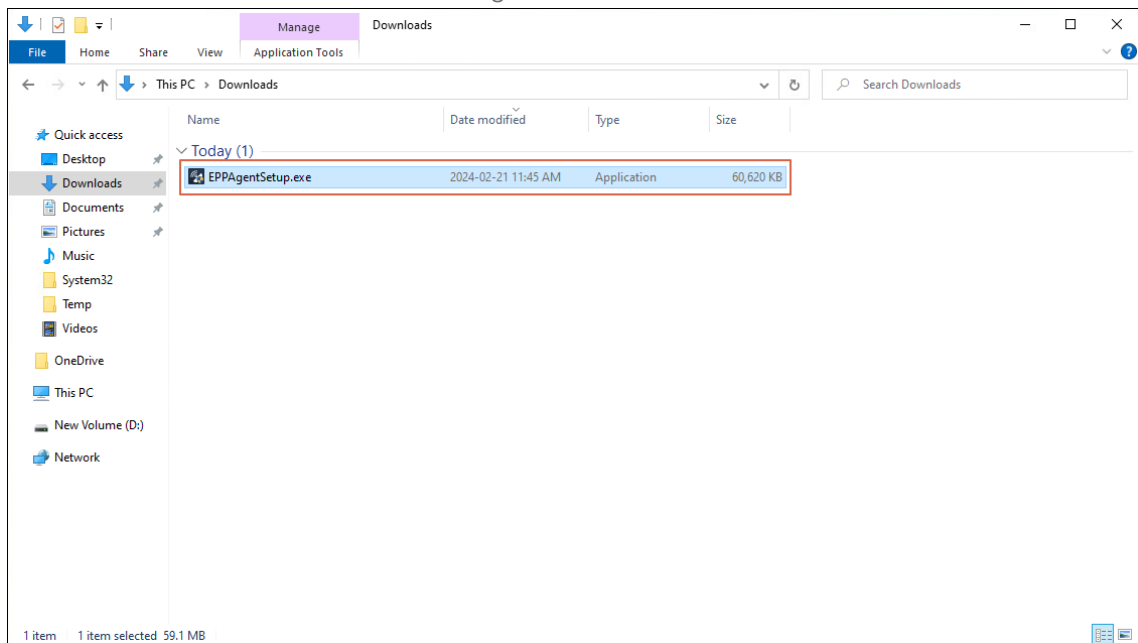

- Click the agent installation file to begin the download.

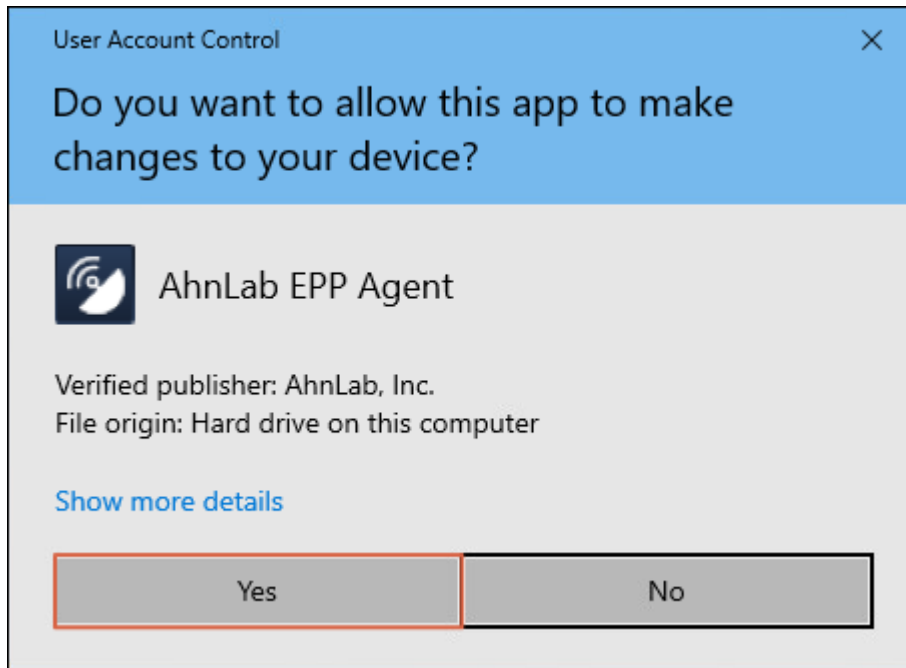

5. Install Agent

5-1) Run the Agent Installation File

- Double-click and run the downloaded agent installation file.

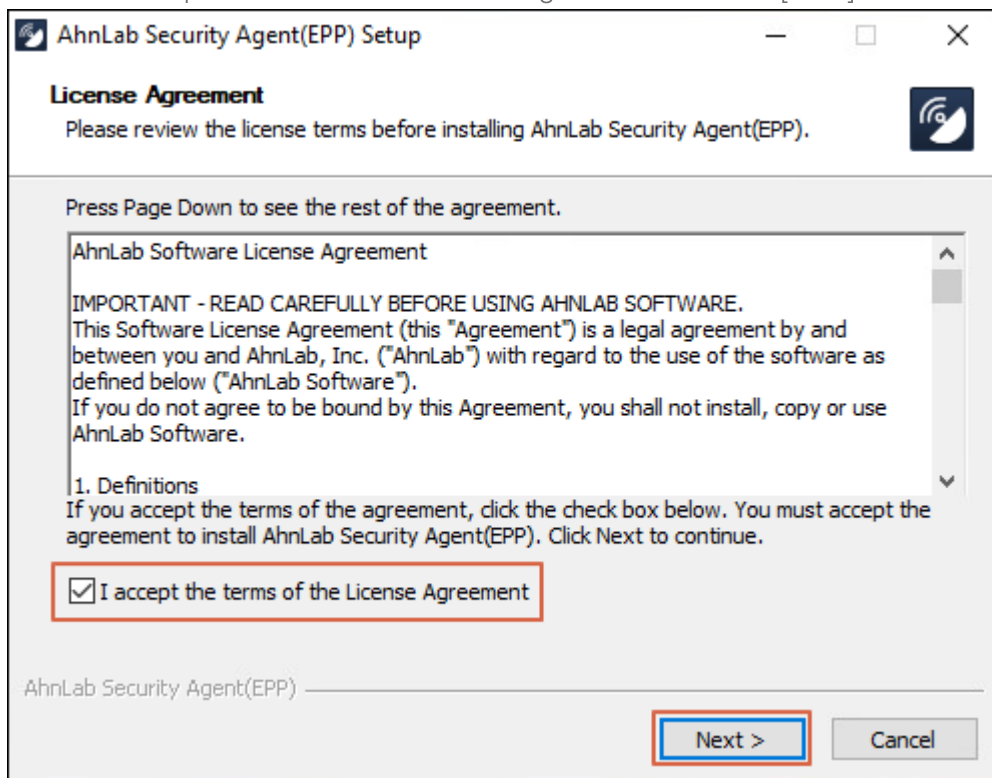

- Click [Yes] from the User Account Control.

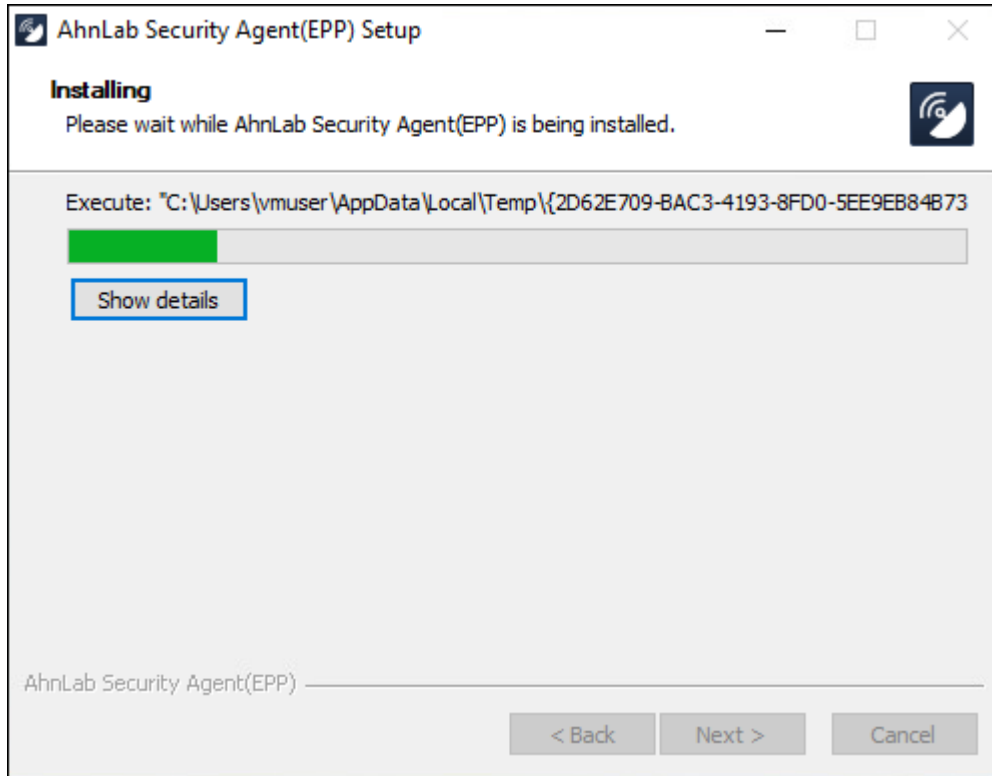

5-2) Proceed to Install the Agent

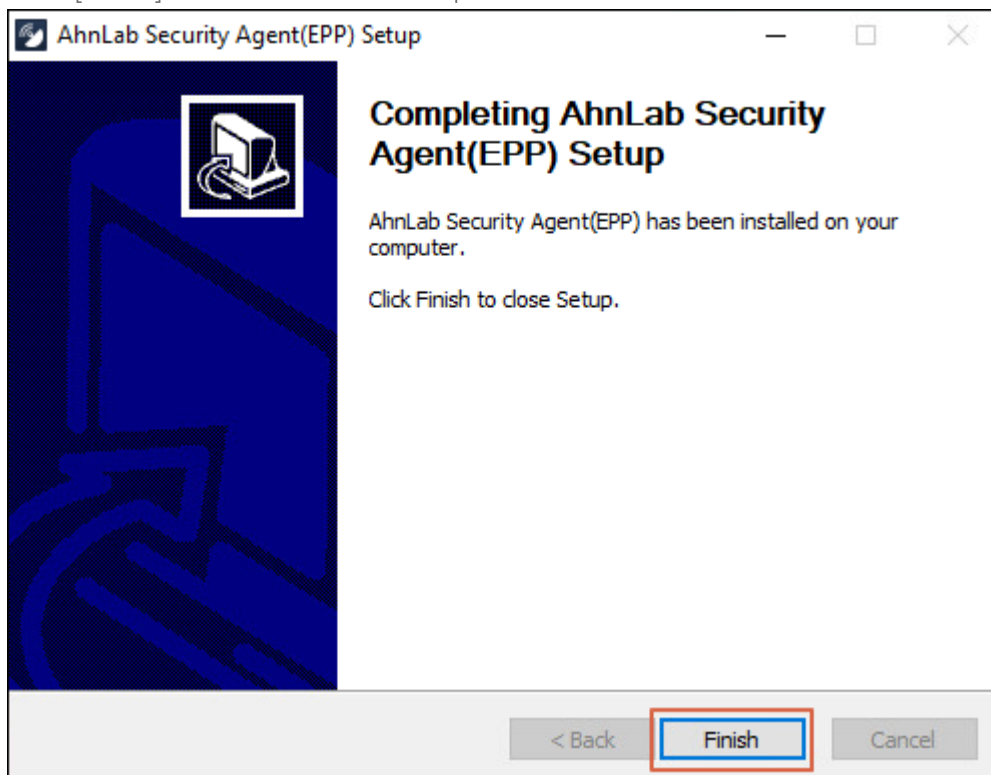

- Check to accept the terms of the License Agreement and click [Next].

- Installation will begin.

- Click [Finish] after installation is completed.
